

# IDEAONE 2025

# .06

INNOVATION  
SINCE 1929.

*Good for you,  
better for the future.*

THE SUSTAINABLE CHOICE

# Good for you, *better for the future.*

## THE SUSTAINABLE CHOICE

For us at Fami, **the concept of company and of business** does not just mean producing and selling.

It means embracing a **broader** and **deeper vision**, which focuses on our responsibility towards the **planet** and the **future generations**.

This philosophy is enclosed in a perfect circle composed of three principles, each of which feeds the next and benefits from the previous one.

## 01.

---

## CO<sub>2</sub> REDUCTION

**Sustainability** and **eco-efficiency** are at the heart of **our commitment** for a **greener future**

**Good for you,  
better for  
the future.**

**02.**

---

## **DURABILITY**

A **100% made in Italy** production and **high-quality** materials guarantee sturdy and durable furnishings that **last over time**

**03.**

---

## **REUSE**

Research and design ensure our solutions are **adaptable** to new uses and contexts, **increasing** their **useful life** and **reducing waste**

# CO<sub>2</sub> REDUCTION

## Sustainable from production to delivery

The commitment to **reduce CO<sub>2</sub>** emissions has triggered a revolution in our **production** and **shipping phases**.

- ✓ Use of renewable and self-produced energy in production
- ✓ Reuse and recycling of waste
- ✓ Adoption of regenerated raw materials
- ✓ Disassembled products to reduce transport volumes
- ✓ Recyclable and low-plastic packaging

# DURABILITY

## Long life for your purchase

Each of our products is the result of a meticulous process of **research, development,** production and testing to offer **durable** and **reliable solutions** over time.

- ✓ Study of materials
- ✓ Development of multifunctional solutions
- ✓ Constant quality control
- ✓ Physical-mechanical tests

# 03 REUSE

## *New life, new challenges*

Our products are never an end unto themselves: they are part of an **innovative ecosystem**, where each component can be easily reused and integrated to find **new life** in other solutions.

- ✓ *Interconnected furnishing system*
- ✓ *Adaptability and versatility for new uses*
- ✓ *Interchangeable components between different solutions*
- ✓ *High-quality spare parts*

*Good for you,  
better for  
the future.*

### CONSULTING

You have a special project you would like to create, or a new area to outfit? The Fami sales consultants are on hand to analyse all your needs and create the optimal furnishings for your company.

### WARRANTY

The 10-year warranty on Fami products aptly reflects the premium-quality materials we use and the care and dedication that go into the production of our furnishings to make them reliable and durable.

### ORDERS

Ordering Fami Ideaone has never been so easy! Choose among various furnishings and contact your area agent or dealer to complete your order.

### COLOUR RANGE

Fami Ideaone furniture comes in standard colours, both single and two-tone, which vary depending on the selected product. Additional colours are available on request to customise individual work areas or adapt the furniture to corporate colours.

### VALIDITY

The Fami Ideaone catalogue is valid from 01/02/2025 to 31/01/2026.

### SUBSIDIARIES AND DEALERS

Fami is always close to you! Over the years we have set up four European subsidiaries besides an extensive network of dealers and distributors, both in Italy and abroad, to provide consulting and assistance wherever you are.

### CUSTOMER CARE

For any queries, information or problem, our after-sales support service is always at your disposal. In the event of damaged or broken products, you will always receive Fami original spare parts as replacements.

### SHIPPING

All Fami products are prepared and packaged with the utmost care, using materials that guarantee the highest degree of protection during the shipment. Most of the products are shipped unassembled for optimising space in the warehouse and during transport.

### COLLECTION TANKS + PERFORM STEEL SHELVES AND TANKS

Suitable for flammable liquids under GHS categories 1 - 3 and water-polluting liquids under GHS categories 1 - 4. Corrosive substances are not allowed.

### PE COLLECTION TANKS

Suitable for water-polluting liquids under GHS categories 1 - 4. Flammable substances are not allowed.

# SPACE-SAVING OPEN FRONT BINS

## PICKING BOX AIR

Air is the range of plastic bins created by Fami. Functional and stylish, these containers are designed to optimise the spaces and organisation of workstations, warehouses and transport.

The **Picking Box Air** bins are a **space-saving** solution for storing components and C-Parts, characterised by a particular **structure** designed to be able to store them both **stacked** and **nested** inside each other and to be **compatible** with hopper-type containers from other brands. Each element of the bin has a precise purpose: the lateral **ribs** and the reinforced **bottom strengthen** the structure and **distribute** the load evenly; the **patented inserts** ensure a **stable** and safe **stacking**; the large **front opening** maximises the **visibility** of the contents and the **ergonomics** when removing the material; the **rear hook** allows positioning the Picking Box Air on the profiles of Bin Cart trolleys and Iron Team bars.

**STACKABLE AND  
COMPATIBLE**

**NESTABLE**

**INTEGRABLE**

**ECO-FRIENDLY**

## PICKING BOX AIR

The bins are characterised by:

1. Handle
2. Stacking inserts
3. Structural reinforcement
4. Conical shape to facilitate nesting the bins one inside the other
5. Rear hook for fastening on bars (size 1, 2, 3A2, 3)  
Rear handle for transport (size 4, 4A5)

Available in 6 colours:

### PATENTED STACKING SYSTEM

The patented inserts ensure a firm and safe stacking of the various Picking Box Air bins and distribute the weight evenly.

### STACKABLE AND NESTABLE

The Picking Box Air bins can go from stacked to being nested one inside the other with a simple movement of the hand.

## 6 DIMENSIONS

Picking Box Air is available in 6 sizes with different storage capacities.

## REINFORCED BASE

The bottom is equipped with particular ribs to increase its sturdiness and distribute the weight.

## FRONT OPENING

The front opening is wider and more ergonomic to increase visibility and facilitate removal of the contents when stacked.

## LABELS

Adhesive labels can be placed in the front space to facilitate classification of contents.

## COMPATIBILITY

The shape of the upper edges is designed to ensure stacking bins from other brands.

## REAR HOOK

The size 1, 2, 3A2 and 3 bins are equipped with a rear hook that increases the stability of the container when it is installed on the profiles of Bin Cart trolleys or on Iron Team bars. Whereas the Picking Box Air size 4 and 4A5 presents a handle to facilitate manual handling.

## MORE SPACE AND ERGONOMICS

The Picking Box Air bins represent the evolution of the traditional hopper-type containers on the market.

Compared to the Picking Box Classic bins, Air containers feature a larger front opening which makes picking the stored material more ergonomic and improves visibility.

The particular shape of the side walls of the Picking Box Air bins does not obstruct vision and does not reduce the internal space of the container. The storage capacity of the Air line, in fact, is greater than that of the Classic: the structural layout of the walls is distributed in such a way as to create new areas that largely compensate the spaces occupied by the ribs.

Internal storage space comparison:

## OPTIMISED AND EFFICIENT TRANSPORT

The Picking Box Air range allows saving 50% space in the warehouse and during transport. The nesting feature and the compatibility of the bins with Euro pallets, in fact, make the various internal and logistical operations more efficient and increasingly optimised, resulting in a reduction in terms of company consumption and environmental impact. In particular, an analysis revealed how the use of Picking Box Air containers leads to a decrease in warehousing (-57%) and internal handling (-27%) costs, as well as to lower CO2 emissions from the logistics chain (-10 tons)\*.

\* The analysis was carried out by simulating the use of Picking Box Air bins for a year in the Fami company activity. The analysis was carried out by comparing the totality of the activities and the related consumption of traditional Picking Box containers in 2023 with the same quantity of activity recalculated based on the consumption necessary for storing and handling the Picking Box Air bins.

# SPACE-SAVING BINS FOR RACKS

## RK BOX AIR

**AIR**

Air is the range of plastic bins created by Fami. Functional and stylish, these containers are designed to optimise the spaces and organisation of workstations, warehouses and transport.

The **RK Box Air rack bins** are innovative solutions for the **safekeeping** and **storage** of a wide range of components. The unique design was created to be able to **stack** the various containers in total safety and to be able to **nest them one inside the other**, resulting in a notable **saving of space**. The large front opening makes it easier to remove the material, while the **reinforced bottom** has a special central groove which, used in combination with the shelf guide, transforms the bin into an actual **drawer** with an opening and closing lock.

REMOVABLE

STACKABLE

NESTABLE

MODULAR

## RK BOX AIR

Rack bins are characterised by:

1. Reinforced edges
2. Handle
3. Stacking inserts
4. Conical shape to facilitate nesting the bins one inside the other
5. Structural reinforcement for installing transversal dividers
6. Lid hook
7. Set up for front panel

Available in 2 colours:

### PATENTED STACKING SYSTEM

The patented inserts ensure a firm and safe stacking of the various RK Box Air bins and distribute the weight evenly.

### STACKABLE AND NESTABLE

RK Box Air bins can go from stacking to being nested one inside the other with a simple hand movement.

## REINFORCED EDGES AND BOTTOM

The reinforced edges and bottom prevent deformation and strengthen the structure of the RK Box Air bins for containing heavy loads.

## 4 DIMENSIONS

The bins are available in two heights and two widths.

## LABELS

Adhesive labels can be placed in the front space to facilitate classification of contents.

## ACCESSORIES

RK Box Air bins can be completed with a wide range of accessories such as front panels, lids and transversal dividers.

## MAXIMUM VISIBILITY

The accessories for dividing and protecting the contents are made of transparent polystyrene to ensure maximum visibility and immediate identification of the stored materials.

## FRONT PANEL

The transparent front panel closes the front opening of the RK Box Air without blocking the view of the contents. The particular design adapts perfectly to the shape of the bin, inserting with a click. It can be used in combination with the lid to completely close the container.

## DIVIDER

The transversal divider splits the internal space of the RK Box Air into several compartments for storing components of a different nature. It is transparent to allow viewing all the material and fits perfectly into the side reinforcements without taking up space.

## LID

The RK Box Air lid is interlocked on the upper part of the bin and has a partial or total opening. Its transparency makes the contents always visible and it can be used in combination with the front panel for fully protecting the contents of the RK Box Air.

## MODULAR RACKS FOR BINS

The bin rack has a variable number of shelves on which it is possible to organise the RK Box Air bins neatly and safely.

Each shelf is equipped with a guide that fits perfectly into the groove on the bottom of the bin and which makes RK Box Air a practical and safe drawer, equipped with an opening and closing lock. Unlike the traditional racks for RK Box, therefore, it is not necessary to install rear stops as once the container is pulled out it will lock without falling. It is possible to expand the shelving at any time: in fact, you can simply stack the various racks using the practical flaps located in the upper part.

# OPEN FRONT BINS

## PICKING BOX CLASSIC

The **Picking Box hopper-type front opening bins** are the professional solutions for the management and collection of small components, spare parts and small items. They are characterised by a **front opening** which facilitates viewing and removal of the contained material and are equipped with **reinforced edges** to be able to stack them in complete safety.

Picking Box can be enhanced with a wide range of accessories, both to divide the internal space and to protect and identify the contents. In addition to traditional dividers, in fact, façades, dust covers, lids and labels are available.

**HOPPER-TYPE  
FRONT OPENING**

**STACKABLE**

**STANDARD  
LABELS**

**WIDE RANGE OF  
ACCESSORIES**

# CLASSIC

## PICKING BOX

The different models of bins with hopper-type opening are characterised by:

1. Suspension guides with reinforced edges
2. Beveled front corners
3. Label holder with standard labels
4. Fitting for longitudinal divider
5. Couplings for accessories

Available in 4 colours:

### REINFORCED EDGES

The reinforced edges make the frame of the bin more sturdy and facilitate weight distribution in the event of stacking, avoiding deformation.

### HANDLES

The front and rear handles are ergonomic to facilitate gripping and moving of the Picking Box within the work area.

### BASE

The hopper-type opening bins are available with a smooth base or reinforced base for a higher load capacity.

## STACKABLE AND COMPATIBLE

The particular shape of the upper and lower part of the bins with hopper-type opening allows **stable and safe stacking** of the Picking Box even of different sizes and in the presence of lids and dust covers. In case of stacking, access to the material contained is still possible thanks to the front opening.

Furthermore, the Picking Box Classic are **compatible** with the bins with hopper-type opening of **other brands**.

# BINS FOR RACKS

## RK BOX CLASSIC

The **RK Box** boxes are used for the storage of small parts and small components and are sufficiently sized to be able to store these items inside **shelves**. The different models and formats, in fact, can be inserted into the dedicated compartments of the modular shelving to create an organised and tidy **C-Parts warehouse**. Stacking is guaranteed by the design of the upper edge and of the base and, thanks to the lateral ribs, there is no deformation as the weight is distributed along the entire box. RK Box are equipped with internal grooves for the insertion of longitudinal and transversal dividers and are designed for the addition of a practical dust cover to protect the contents from dirt and dust.

REMOVABLE

STACKABLE

STANDARD  
LABELS

MODULAR

# CLASSIC

## RK BOX

The shelving boxes are characterised by:

1. Suspension guides with reinforced edges
2. Beveled front corners
3. Label holder with standard labels
4. Fitting for transversal divider
5. Fitting for longitudinal divider

### REINFORCED EDGES

The reinforced edges allow stacking of the box and prevent it from deforming due to the weight. The base is smooth and has dedicated guides to facilitate the sliding of RK Box in the shelving guides.

### DIVIDERS

The grooves on the side and rear walls facilitate the insertion of longitudinal and transversal dividers to organise the internal space.

### LOCK

The rear lock prevents the box from accidentally falling from the shelving when it is being removed.

### MODULAR SHELVING

The RK Box boxes can be stored in the dedicated steel shelving with shelves to create an organised supply area. In fact, each shelf has suitable slots on which to install the guides for sliding of the boxes.

# EURO CONTAINERS

## EURO BOX CLASSIC

The **Euro Box** are typically used for the organisation of warehouses and, above all, in distribution and logistics. These boxes, in fact, have dimensions that are compatible with **Euro pallets** for load optimisation during transportation.

Euro Box is available in different variants based on the type of handle (closed, open, shell) or base chosen (smooth or reinforced). The reinforced edges make the entire frame more solid and sturdy and allow the stacking of multiple boxes both with and without lids. Divider boxes and comb dividers in polypropylene are available for internal division of the container and for better management of the material to be stored.

The **Euro Box ESD** are made of conductive polypropylene for use in environments at risk of electrostatic discharge.

**MEASUREMENTS  
COMPATIBLE WITH  
EUROPALLETS**

**STACKABLE**

**POLYPROPYLENE  
OR ESD  
POLYPROPYLENE**

**WIDE RANGE OF  
ACCESSORIES**

# CLASSIC

## EURO BOX

The boxes are characterised by:

1. Reinforced walls
2. Provision for lid
3. Handles (open, closed or shell)
4. Smooth or reinforced base

### REINFORCED EDGES

The reinforced edges strengthen the entire frame, making it resistant to heavy loads in the event of stacking. The latter can occur even if the hinged lid is present.

### HANDLES

In addition to traditional closed or open handles, Euro Box is also available with a shell handle.

### BASE

The Euro Box containers are available with a smooth base or reinforced base for a higher load capacity.

### ESD POLYPROPYLENE

The ESD polypropylene Euro Box can be used for the storage and transportation of electronic products as they protect the contents from possible electrostatic discharges.

### CUSTOM BRANDING

Upon request it is possible to brand the Euro Box containers with the company name or logo.

# SMALLWARE DRAWERS

## VISUAL BOX CLASSIC

**Visual Box** is the modular system of **drawer units for small parts** characterised by transparent drawers with **tilting opening**. Each drawer unit consists of two elements: a sturdy and resistant polystyrene body and a variable number of unbreakable drawers in transparent styrene copolymer. The latter's transparency and opening method **facilitates viewing and extracting the stored content**. Regardless of the number of drawers chosen, the various Visual Box models have the same width to be able to be **stacked** and to create modular and expandable warehousing for small parts at any time. These solutions can be integrated into many furnishings, such as benches or swivel arms, or they can be installed on frames to create wall-mounted shelving for small parts.

**TRANSPARENT  
DRAWERS WITH  
TILTING OPENING**

**STACKABLE AND  
COMPATIBLE**

**STANDARD  
LABELS**

**MODULAR**

# CLASSIC

## VISUAL BOX

The drawer units for small parts with tilting opening are characterised by:

1. Transparent drawer
2. Tilting opening
3. Label holder with labels
4. Stacking hook

### HIGH VISIBILITY

The transparent styrene copolymer drawers are unbreakable and make it easy to see and identify the contents of each Visual Box.

### HANDLE WITH LABELS

All drawers have a label holder at the top to catalogue the contents. On the front there is a handle for an ergonomic opening of the drawer.

### FRAMES FOR VISUAL BOX

The 500 mm high Visual Box frames can be stacked using a special patented interlocking system to create modular warehouses with a maximum height of 2000 mm on which it is possible to organise the various Visual Box cabinets.

### STACKABILITY

The hook installed on the top of Visual Box allows you to stack each module in a stable and safe way.

In case of stacking Visual Box with different depths, the installation of the drawer unit with lesser depth can take place from the front or rear.

# NON-SLIP MATS

## MAT CLASSIC

The **MAT mats** contribute to **increase efficiency and safety** in the workplace. The particular texture of the surface, in fact, increases friction while walking or working, avoiding possible falls or injuries. The addition of **joints and corners** creates a ramp that reduces the risk of tripping and makes getting on and off easier even when items with wheels such as trolleys or drawer units are used.

**NON-SLIP  
TEXTURE**

**SAFE ASCENT/  
DESCENT**

**EASY FIT**

**MODULAR**

## MAT

The non-slip mats are characterised by:

1. Non-slip mat
2. Mat joining piece
3. Mat corner

## MODULAR SYSTEM

Every non-slip mat is equipped with special inserts along the entire perimeter to ensure freedom to join multiple components. It is thus possible to obtain mats of different shapes and widths, easily adaptable to the space available.

# INDUSTRIAL STORAGE BOXES

## PLASTIC BOXES

Plastic boxes contribute to improving storage operations, making storage and transport processes increasingly efficient and safe. In fact, these solutions ensure a high containment volume and, depending on the model, can be used for storing semi-finished products and dangerous goods under ADR regulations. Made of **high density polyethylene (PE-HD)**, they have a high resistance to impacts, temperature changes and ultraviolet rays and can be moved with pallet trucks and forklifts. The boxes are **stackable** and can be accessorised with wheels, crosspieces and lids.

**MOVABLE WITH  
FORKLIFT**

**STACKABLE**

**HIGH DENSITY  
POLYETHYLENE  
HDPE**

**CAN BE  
ACCESSORISED**

# METAL STORAGE BOXES AND BINS

## STEEL

The **metal boxes and containers** have a solid structure to be able to transport and hold small parts and heavy components. The sides and bottom, in fact, have specific **ribs** which strengthen the entire container and ensure **resistance to intensive use, impacts and heavy loads**. Steel offers small-sized **hopper-type boxes and containers** for organising components on workstations or in the warehouse or **metal storage boxes with opening bottom or large hopper-type containers** for managing waste and semi-finished products.

### CONTAINERS WITH OPENABLE BOTTOM WITH ROLLERS

Lifted with a forklift truck through the four handles welded onto the top edge, they can be used to dump material through the openable bottom with rollers (87% opening). They can be opened easily and safely through the lever placed on the 800 mm side, while they can be closed by means of a special device consisting of levers and steel rollers.

# METAL SHELVING

## ST

System ST is an easy-to-assemble, solid and high-capacity metal shelving unit. The **modular structure** allows creating numerous solutions with variable widths and different configurations. The basic version of the **warehouse rack** with slotted shelves, dividers and separators, in fact, can expand and transform to become a **tyre rack**, a **dynamic warehouse rack** with inclined shelves or tilting frames with tracks and rollers, or a **rack for small parts with containers**.

1. Slotted upright with 25 mm pitch for the side
2. Slotted shelf (load capacity up to 300 kg)
3. Rear wall (on request)
4. Side wall (on request)
5. Clothes hanging bar (on request)
6. Simple-extension drawer (load capacity 50 kg)  
Telescopic-extension drawer (load capacity 100 kg)
7. Plinth (on request)
8. Pair of hinged doors with cylinder lock and 2 keys (on request)
9. Central wall (on request)
10. Connection crosspiece for sides
11. Stringer W=2000 mm  
Stringer W=2600 mm (on request)
12. Connection crosspiece between shelves (on request)
13. Plastic foot/cap
14. Vertical dividers (on request)
15. Separators H=100 mm
16. Set of edge strips with trapezoidal dividers
17. Separators H=40 mm
18. Plastic coupling for uprights
19. Pair of tyre holder supports
20. Variable inclination frame with length-adjustable roller tracks
21. Pair of brackets for inclined shelves (from approximately 5° to 30°)
22. Box-stop edge
23. Holding shelf
24. Slides for containers
25. Anti-tipping stop for containers

**EASY TO ASSEMBLE**

**MODULAR**

**SHELF LOAD CAPACITY UP TO 300 KG**

**BAY LOAD CAPACITY 2300 KG**

# SINGLE-PIECE RACKS

## DOMINO

The Storage Domino **single-piece bin-holding rack** features a **honeycomb structure** for creating modular warehouses in which to organise hopper-type bins made of iron or polypropylene. In fact, it is possible to **stack them** fully safely to create solutions that develop in height and width based on the spaces available. Pulling out the bins is quick and safe: a special hook installed in the front part of the guides prevents the container from falling out fully or accidentally.

# WORKSHOP WORKBENCHES

## WORK

The Work series workbenches are **flexible solutions** and easily customisable according to needs. They can be set up with a **top** in 30 mm **beech** multiplex wood or with a 2,5 mm steel worktop and are available in **3 widths**: 1000, 1500 or 2000 mm. The Work workbenches can have **fixed steel legs** and **lower shelf** as standard, or a **lower half shelf** as standard and **height-adjustable legs** set up for installing wheels. The steel structure can accommodate cabinets with doors or drawers, shelves or half shelves, perforated panels and ledges.

**SIMPLE-EXTENSION  
DRAWERS**

**DRAWER LOAD-  
BEARING  
CAPACITY 80 KG**

**USEFUL DEPTH OF  
DRAWER 513 MM**

**DIVIDING  
MATERIAL**

**HEIGHT-ADJUSTABLE  
LEGS**

## WORK

### BEECH MULTIPLEX WORKTOP

The beech multiplex worktop offers strength and resistance, ensuring a stable and solid surface, perfect for heavy and precision operations. It is resistant to scratches, impacts and other forms of wear and has a thickness of 30 mm.

### STEEL WORKTOP

The steel worktop is ideal for intensive work environments where cutting tools are used, thanks to its high resistance to wear and abrasion. It is 2.5 mm thick and has three raised edges.

### RUBBERISED STEEL COVER

The rubberised steel cover preserves the integrity of the worktop should acids or oils be used or for heavy work. It can be applied to both multiplex and steel tops.

### WHEELS

The wheels transform the Work height-adjustable workbenches into practical mobile workstations. They are available in synthetic non-marking rubber or elastic rubber and are supplied in kits consisting of 2 swivel wheels with brakes and 2 fixed wheels.

### DIVIDING MATERIAL

The drawer can be internally divided by means of **partition drawers for small parts and longitudinal and transversal metal dividers**. The latter are fixed to the perforated base of the drawer by means of screws to prevent spillage of the stored material.

## MODULAR AND EXPANDABLE

1. Perforated side panel
2. Rear panel
3. Adjustable legs
4. Additional half-shelf
5. Cabinet with door
6. Cabinet with 4 drawers
7. Multiplex worktop

# WORK

### ADDITIONAL HALF-SHELF

The additional half-shelf is installed in the lower part of the workbench to provide a large and space-saving shelf for objects.

### ADDITIONAL MIDDLE SHELF

The additional shelf optimises the space on the workbench, offering an extra surface for storing work materials.

### PERFORATED SIDE PANEL

The perforated panel transforms the sides of the workbench into practical tool holder walls, ideal for attaching accessories and tool hooks.

## COLOURS

The Work workbench is available in 12 colour combinations, 2 of which are available in stock.

# COMPACT WORKBENCHES

## BR

The Work Master BR workbench features a **modular structure** that allows it to be expanded and enriched at any time, constantly adapting to the user's needs. Available in **4 widths**, from 1000 to 3000 mm, it is equipped with a sturdy **worktop** in multiplex **beech** wood with a thickness of 40 mm and with **height-adjustable legs** for an ergonomic working position. It can be set up with high-capacity solutions such as tool walls, cabinets with shelves, with doors and drawer units. The latter can be customised both in terms of pull-out solutions, from 92 to 100%, and of load capacity, from 50 to 100 kg.

**FULL-EXTENSION  
DRAWERS**

**DRAWER LOAD-  
BEARING  
CAPACITY 50-75-  
100 KG**

**USEFUL DEPTH OF  
DRAWER 27 EH**

**DIVIDING  
MATERIAL**

**HEIGHT-ADJUSTABLE  
LEGS**

# BR

## BEECH MULTIPLEX WORKTOP

The beech multiplex worktop offers strength and resistance, ensuring a stable and solid surface, perfect for heavy and precision operations. It is resistant to scratches, impacts and other forms of wear and has a thickness of 40 mm.

## RUBBERISED STEEL COVER

The rubberised steel cover preserves the integrity of the worktop should acids or oils be used or for heavy work.

## REAR PANEL

The rear panel, which comes as standard on BR workbenches, reinforces the structure of the bench and creates a compartment in the lower part, preventing the stored material from accidentally falling.

## LOCK

The cylinder lock is connected via a square rod to the rear locking unit consisting of a rotating element in plastic material and a locking rod in sheet steel. Turning the key activates the cam system of the locking unit which rotates the rear rod (A).

## DIVIDING MATERIAL

The drawer can be divided internally using 5S Pikpad tool trays, divider boxes for small parts and longitudinal and transversal metal dividers. The latter are fixed to the perforated base of the drawer by means of screws to prevent spillage of the stored material.

## MODULAR AND EXPANDABLE

1. Perforated side panel
2. Support for intermediate half-shelf
3. Rear panel
4. Multiplex worktop
5. Adjustable legs
6. Modular unit
7. Cabinet with drawers
8. Cabinet with door
9. Technical cabinet with door

## DRAWER EXTRACTION AND MANAGEMENT

The Master DE drawer represents a revolution in the world of industrial furnishing as it was designed and developed to be customised independently in terms of extraction/capacity and internal division.

## FREELY CONFIGURABLE

The new flexible extension guide allows mechanical adjustment of the rear stop of the drawer/retractable shelf in **3 different positions**, thus obtaining **3 different capacities: 50, 75 and 100 kg**. A label indicates the maximum capacity of the drawer depending on its extraction and the type of guide.

### FLEXIBLE GUIDE CONFIGURED FOR FULL EXTRACTION 50 KG

### FLEXIBLE GUIDE CONFIGURED FOR FULL EXTRACTION 75 KG

### FLEXIBLE GUIDE CONFIGURED FOR PARTIAL EXTRACTION 100 KG

### FULL EXTENSION

**FREE TO CONFIGURE**  
Change the drawer's extension quickly and easily to increase the load-bearing capacity up to 100 kg.

### HIGH-PERFORMANCE RUNNERS

**QUICK MOVEMENT WITHOUT PROBLEMS**  
The runners as long as the drawers allow the bearing to be moved to the front of the cabinet, thus increasing the visibility, load-bearing capacity and extension.

### PERFORATED DRAWERS

**ORGANISATION DOWN TO THE MILLIMETRE**  
Holes and slots on the drawers make it easier to add internal dividers for optimally arranging tools and materials.

The innovations that simplify identification of the contents of the drawers.

With Sylogik® Syfront technology, the drawer front is no longer just a closing element but becomes an actual visual interface.

- Customisation with aesthetic and decorative elements
- User input: labels to describe and catalogue the contents
- User output: ability to insert visual or descriptive messages on the handle

**CUSTOMISABLE HANDLES**

**A WEALTH OF INFORMATION**

Add barcodes, labels or images to handles for quick identification of the contents of each individual drawer.

# BR

## COLOURS

The Master cabinet is available in 12 colour combinations which can be associated with 8 different colours for the handles to create customised solutions down to the smallest detail. It is therefore possible to assign specific colours to particular work areas or projects or to implement the corporate colour even in the furnishings installed in the company.

**10** RAL colours for the metal part  
**8** colours for the plastic accessories  
**Infinite combinations**

# PROFESSIONAL WORKBENCHES

## MASTER

The **Master** workbenches offer a perfect combination of **versatility**, functionality and customisation. Available in **5 widths** (1300, 1500, 2000, 2500, 3000 mm), these high-load capacity benches are equipped with a **worktop** in **multiplex beech** with a thickness of **40 mm**. They are extremely customisable with a wide range of components such as additional shelves, cabinets with **drawers** with variable load capacity and pull-out, cabinets with **vice** or cabinets for **connections**. The innovative **legs** can be **fixed**, **height-adjustable** or with **wheels** and include a **hole** with cap for installing a 2-socket **power strip**.

**FULL-EXTENSION  
DRAWERS**

**USEFUL DEPTH OF  
DRAWER 27 EH**

**DIVIDING  
MATERIAL**

**KEY-OPERATED  
CLOSURE**

**HEIGHT-ADJUSTABLE  
LEGS**

# MASTER

## BEECH MULTIPLEX WORKTOP

The beech multiplex worktop offers strength and resistance, ensuring a stable and solid surface, perfect for heavy and precision operations. It is resistant to scratches, impacts and other forms of wear and has a thickness of 40 mm.

## RUBBERISED STEEL COVER

The rubberised steel cover preserves the integrity of the worktop should acids or oils be used or for heavy work.

## HANDLE

The handle makes it easy to move the workbench with wheels, offering a secure grip and optimal control during handling.

## DIVIDING MATERIAL

The drawer can be divided internally using 5S Pikpad tool trays, divider boxes for small parts and longitudinal and transversal metal dividers.

## ANTI-TAMPERING SYSTEM

**SAFETY FIRST OF ALL**  
Unlike other cabinets currently on the market, the patented closure system prevents thieves from by-passing the closure. Any forced opening will always be visible.

## WHEELS

The wheels transform the Master workbenches into practical mobile workstations. They are available in synthetic non-marking rubber or elastic rubber and can be fixed, swivel or swivel with brake.

Each leg of the Master workbench has, as standard, a hole with a cap which, if removed, allows fixing a 2-socket power strip. Depending on how the leg is installed, it is possible to choose whether to position the side with the hole at the front or at the rear of the bench.

**VERTEBRATE ANTI-TIPPING ROD**

The rod is in aluminium profile and always remains fixed, without rotating.

The closing movement is obtained by means of **anchors that move vertically** exploiting one of the elementary forces of physics: **gravity**. **The simpler the movement, the less likely the risk of breakages.**

**The rod is drilled with a 25 mm pitch** and allows the application of several closing heads. This means being able to divide access to the drawers into several groups. The division of the groups is configurable in height.

**MECHANICAL SYSTEM**

The mechanical control system of the locking unit uses Sylogik® technology. **The differences are decisive.**

**The system of transmission from the lock cylinder to the rod head consists of steel wires with an elastic sheath and linear movement.**

Compared to the common fixed square rod systems with rotary movement, it allows releasing of the parallelism of the lock cylinder position with respect to the rod head. This allows the designer to apply the cylinder in the most suitable point of the cabinet.

**The lock cylinder rests on a guide drum** so that it is possible to choose from a variety of cylinder manufacturers\*. In this way the cabinet can be integrated with other pre-existing ones, keeping the same type of key.

\* Option on request with extra charge

**FULL EXTENSION**

**FREE TO CONFIGURE**  
Change the drawer's extension quickly and easily to increase the load-bearing capacity up to 100 kg.

**HIGH-PERFORMANCE RUNNERS**

**QUICK MOVEMENT WITHOUT PROBLEMS**  
The runners as long as the drawers allow the bearing to be moved to the front of the cabinet, thus increasing the visibility, load-bearing capacity and extension.

**PERFORATED DRAWERS**

**ORGANISATION DOWN TO THE MILLIMETRE**  
Holes and slots on the drawers make it easier to add internal dividers for optimally arranging tools and materials.

# MASTER

## DRAWER EXTRACTION AND MANAGEMENT

The Master drawer represents a revolution in the world of industrial furnishing as it was designed and developed to be customised independently in terms of extraction/capacity and internal division.

## FREELY CONFIGURABLE

The new flexible extension guide allows mechanical adjustment of the rear stop of the drawer/retractable shelf in 3 different positions, thus obtaining 3 different capacities: 50, 75 and 100 kg. The installation of the innovative telescopic guide increases the capacity of the pull-out drawer/shelf up to 200 kg. A label indicates the maximum capacity of the drawer depending on its extraction and the type of guide.

### FLEXIBLE GUIDE CONFIGURED FOR FULL EXTRACTION 50 KG

### FLEXIBLE GUIDE CONFIGURED FOR FULL EXTRACTION 75 KG

### FLEXIBLE GUIDE CONFIGURED FOR PARTIAL EXTRACTION 100 KG

### TELESCOPIC GUIDE CONFIGURED FOR FULL EXTRACTION 200 KG

# MASTER

## COLOURS

The Master workbench is available in 13 colour combinations to which 8 different handle colours can be associated to create customised solutions down to the smallest detail. It is therefore possible to assign specific colours to particular work areas or projects or to implement the corporate colour even in the furnishings installed in the company.

**10** RAL colours for the metal part  
**8** colours for the plastic accessories  
**Infinite combinations**

## COMPONENTS

The Master workbench legs are all equipped with a hole on one side closed by a cap. By removing the cap, it is possible to insert a 2-socket power strip with its connection cable to provide the bench with a practical source of electricity. The cable passes inside the leg, which is hollow, keeping the workstation tidy and free from visible wires. Depending on the leg's position, the hole can be located at the front or at the rear of the workbench, ensuring a flexible installation.

### 1500/2000

For 1500/2000 mm workbenches, it is mandatory to use a pair of V-shaped brackets for each leg without drawer unit.

### 2500

For 2500 mm workbenches, the legs without drawer unit must be equipped with flush brackets if they are external and with V-shaped brackets if they are central.

### 3000

For 3000 mm workbenches, it is mandatory to install a pair of V-shaped brackets for each leg without drawer unit.

The Dynamic workstation is a dynamic and ergonomic solution with **electronically height-adjustable legs** via a practical keypad with 3 positioning memories. It is available with widths of 985 and 1470 mm and is equipped with a **laminated worktop**. The electrical components can be installed in the standard crosspiece or in the additional frame which also allows fixing the uprights for an equipped wall. Dynamic can be customised with drawer cabinets and with **ESD products** such as mats and earthing sockets to also be used for processing electronic components.

### BASE WORKBENCH WITH REVERSIBLE CROSSPIECE

ART.	W mm	D mm	H mm	RAL
FLE0970E0PD	985	700	740/1140	7035+7016
FLE1470E0PD	1470	700	740/1140	7035+7016

### 1. Reversible crosspiece

The workbench is equipped with legs with electronic height adjustment. The height can vary from minimum 740 mm to maximum 1140 mm.

The numerical keypad allows for controlling the workbench adjustment mechanism. In addition to modifying the worktop's height, it also has 3 positioning memories for rapidly modifying the height of the workbench to the user's requirements.

### FRONT VIEW OF THE CROSSPIECE

### REAR VIEW OF THE CROSSPIECE

The workbench's crosspiece has incisions for fitting the power sockets and the Iron Team Electric residual current devices. The number of incisions varies in relation to the chosen size. The various components can be installed both on the rear and on the front side of the crosspiece. The Iron Team Electric devices are not included with the crosspiece.

TOP VIEW OF THE FRAME

BOTTOM VIEW OF THE FRAME

To assemble the Work Look upright, it is necessary to install the additional frame.

The reversible frame for the workbench has incisions for fitting the power sockets and the Iron Team Electric residual current devices. The number of incisions varies in relation to the chosen size. The various components can be installed both on the top and on the bottom side of the reversible frame. The Iron Team Electric devices are not included with the additional frame.

# DYNAMIC

## COMPONENTS

The Dynamic workbench with electronically adjustable height can be used to create a dynamic and ergonomic industrial workstation suited to applications in a variety of sectors. To maximise the user's comfort, Dynamic offers several solutions: cabinets with drawers, additional frames or crossbeams for electrical components, Work Look perforated panels. The legs with adjustable height are controlled through a practical numerical keypad. The height of the workbench can be varied to the millimetre between minimum 740 mm to maximum 1140 mm. The keypad can memorise three different heights to rapidly and easily adjust the worktop with a few steps.

1. 2-layer ESD mat
2. ESD schuko plug
3. Adjustable strap with button and cable
4. Cable with button

# TOOL HOLDER PANELS

## WORK LOOK

The Work Look **perforated panels** with **10x10 mm** hole can be placed on workbenches, trolleys, wooden walls or walls to create tool panels of different sizes. If installed on workbench uprights, the user can choose whether to use the panel as a **tool wall** or as a **horizontal or inclined shelf** with box-stop edge. Work Look can accommodate a wide range of components: from overhead structures and lamps to bottom-hung wall units, accessories, and hooks.

# MONITOR HOLDERS - MES

## ERGO WORK

MES stations are solutions made up of different types of monitor holders and other hardware for setting up computer workstations in any area of the company. They can be installed directly on the **floor**, using appropriate **uprights**, on **worktops** with the **clamp** profile or on double-slotted **uprights** of tool holder walls and trolleys in the simple version with **swivel arm**. Regardless of the type of fixing chosen, the Ergo Work for MES stations are equipped with practical **VESA** plates for housing monitors and can be enriched with **inclined trays** for keyboards and **shelves** for objects.

qty.	description
1	Monitor holder vertical upright
1	Inclined keyboard and mouse tray
1	Double monitor arm
1	Storage shelf for vertical upright
1	Monitor support plate with VESA standard

IT equipment not included

The vertical upright is made up of two different elements: an **aluminium profile** (1) and a hollow **upright** designed for **fixing to the floor** (5) with screws and plugs. The aluminium profile has specific slots for installing swivel arms, VESA plates and keyboard trays (2). The upright, on the other hand, is equipped with holes in the upper part to adjust the height of the aluminium profile and with an additional series of square holes in the central part for installing **object holder shelves** (3) at different heights. At the base, the practical **cable feed-through hole** (4) facilitates the orderly passage of the electrical cables for the monitor and hardware.

1. Aluminium profile
2. Keyboard tray
3. Object holder shelf
4. Cable feed-through hole
5. Floor fixing

# SWIVEL ARMS

## ERGO WORK

The Ergo Work **swivel arms** increase the storage space available to the operator on workbenches and trolleys. You can choose between two different types of arms: the first can be installed directly on the **upright** of the equipped wall, while the second is fixed onto the **worktop**. Thanks to its wide rotation angle, the position of the arm can be easily adjusted so as to have everything to hand and make the workstation increasingly ergonomic. Ergo Work can accommodate trays, monitor support plates, solutions with containers and perforated panels.

# TOOL ORGANIZER

UNIPOK

PIKPAD

THE BLOCK

IRON TEAM

**UNIPOK TOOL HOOK - 30-PIECE PACK**  
Up to 30 tools can be mounted with 1 pack

ART.	pcs per pack	colour	
FBLIT009007	30	Black	

Unipok is the name of the new **universal hooks** from Fami, which use a screw-in system to allow positioning on perforated boards or wooden panels. Each Unipok hook can be positioned a different angle to mount tools with different shapes and dimensions. Free your imagination and optimise organisation of your wall or workbench-mounted perforated board and wooden board, making sure that everything is always close to hand!

Unipok makes organisation child's play!

Mounting on wood

Mounting on perforated panel

**WITH 4 POSITIONS FOR ENDLESS COMBINATIONS!**

### CREATE THE PERFECT 5S SHADOW TOOL BOX WITH PIKPAD!

With **Pikpad** it is possible to set up a **5S shadow tool box** organised down to the smallest details. The 10x10 square hole bottom of the tray allows for the installation of **Unipok** to create **customised kits** for each job to be performed and, thanks to the practical **tool labels**, it will be possible to identify the type of tool to be housed in each space created.

Pikpad comes complete with a set of 5 sticker sheets:

- 4 sheets with more than 250 tool labels (tool shape + size)
- 1 sheet not pre-cut to make your own stickers

Unipok must be purchased separately

FBLIT035039	36	18	590	287	50	7016	

### 3 ADJUSTMENT POSITIONS

The **patented profile** built into the back of Pikpad allows for the tray to be **adjusted in 3 different positions**. It is therefore possible to adapt the inclination of Pikpad based on the user's height and posture, in order to have everything at hand and work according to the principles of **ergonomics**.

TABLE STAND FOR PIKPAD 5S TRAY SHADOW TOOL BOX

ART.	W mm	D mm	H mm	RAL

PIKPAD002	959	255	198	7016
PIKPAD003	1444	255	198	7016

### MOBILE ORGANISATION

5S shadow tool boxes make tool organisation mobile because they can be installed on different supports and be moved easily thanks to the side handles. They can be placed on worktops using the special table stand, on the uprights of fitted walls using aluminium bars and inside drawers. In the latter case, it is possible to exponentially increase the internal organisation of drawer units by integrating Pikpad with traditional separation items such as divider boxes and metal dividers.

# DRAWER UNITS FOR WORKSHOPS

## FLEXA

Flexa cabinets with drawers are a versatile and compact solution for organising everything you need for work. They feature a **central cylinder lock** and **drawers with 100% total pull-out** which can have a **load capacity varying between 50 and 70 kg**. The inside of the **drawers** is completely customisable thanks to the possibility of dividing them using **dividers, divider boxes and 5S tool trays**. The upper surface can be left free or protected with a **3-edged PVC surface** to carry out work and operations.

**DRAWER LOAD-  
BEARING CAPACITY  
FROM 50 TO 70 KG**

**PERFORATED  
DRAWERS**

**BALL BEARINGS**

**KEY-OPERATED  
CLOSURE**

# FLEXA

## LOCK

The cylinder lock is connected via a square rod to the rear locking unit consisting of a rotating element in plastic material and a locking rod in sheet steel. Turning the key activates the cam system of the locking unit which rotates the rear rod (A).

## 3-EDGE TOP SHELF COATED WITH PVC

The PVC-coated 3-edge top protects the upper part of the cabinet and, thanks to the raised edges, prevents the material placed on it from falling off.

## FREELY ORGANISABLE

The drawer can be internally divided by means of **partition drawers for small parts and longitudinal and transversal metal dividers**. The latter are fixed to the perforated base of the drawer by means of screws to prevent spillage of the stored material.

## PERFORATED DRAWERS

ORGANISATION DOWN TO THE MILLIMETRE  
Holes and slots on the drawers make it easier to add internal dividers for optimally arranging tools and materials.

**FULL EXTENSION**  
100%

**LOAD CAPACITY**  
50 / 70 KG

## COLOURS

The Flexa cabinet is available in 3 colour combinations.

# DRAWER UNITS FOR INDUSTRY

## MASTER DE

PATENTED\*

The drawer cabinets of the Master DE line ensure storing work materials is highly flexible thanks to the possibility of setting them up both with **hinged doors and shelves** and with **drawers** with adjustable capacity and pull-out. In particular, the drawers can have a **pull-out between 92% and 100%** and a **load capacity between 50 and 100 kg**. Furthermore, they can be freely divided internally with **dividers, divider boxes and tool trays**. **Upper tops** of various types can be installed as well as **plinths** to raise the cabinet from the ground.

**DRAWER LOAD-BEARING CAPACITY FROM 50 TO 100 KG**

**PERFORATED DRAWERS**

**BALL BEARINGS**

**KEY-OPERATED CLOSURE**

# MASTER DE

## TOP IN SATIN STAINLESS STEEL

The satin stainless steel top allows work and interventions to be performed without damaging the cabinet. It features a high level of corrosion and heat resistance.

## MULTIPLEX TOP

The multiplex top transforms the upper part of the cabinet into a solid and robust work surface. It is resistant to shocks and scratches and is suitable for heavy-duty operations.

## RUBBER LINED STEEL TOP

The top is made of galvanised steel and coated with oil-resistant rubber. It is particularly suitable for the use of oils or for interventions that involve cutting tools.

## 3-EDGE TOP SHELF COATED WITH PVC

The PVC-coated 3-edge top protects the upper part of the cabinet and, thanks to the raised edges, prevents the material placed on it from falling off.

## BASES

The bases have a dual function: they raise the drawer cabinet off the floor and allow it to be moved using forklift trucks or transpallets.

## LOCK

The cylinder lock is connected via a square rod to the rear locking unit consisting of a rotating element in plastic material and a locking rod in sheet steel. Turning the key activates the cam system of the locking unit which rotates the rear rod (A).

## FULL EXTENSION

**FREE TO CONFIGURE**  
Change the drawer's extension quickly and easily to increase the load-bearing capacity up to 100 kg.

## HIGH-PERFORMANCE RUNNERS

**QUICK MOVEMENT WITHOUT PROBLEMS**  
The runners as long as the drawers allow the bearing to be moved to the front of the cabinet, thus increasing the visibility, load-bearing capacity and extension.

## PERFORATED DRAWERS

**ORGANISATION DOWN TO THE MILLIMETRE**  
Holes and slots on the drawers make it easier to add internal dividers for optimally arranging tools and materials.

# MASTER DE

## DRAWER EXTRACTION AND MANAGEMENT

The Master DE drawer represents a revolution in the world of industrial furnishing as it was designed and developed to be customised independently in terms of extraction/capacity and internal division.

## FREELY CONFIGURABLE

The new flexible extension guide allows mechanical adjustment of the rear stop of the drawer/retractable shelf in **3 different positions**, thus obtaining **3 different capacities: 50, 75 and 100 kg**. A label indicates the maximum capacity of the drawer depending on its extraction and the type of guide.

### FLEXIBLE GUIDE CONFIGURED FOR FULL EXTRACTION 50 KG

### FLEXIBLE GUIDE CONFIGURED FOR FULL EXTRACTION 75 KG

### FLEXIBLE GUIDE CONFIGURED FOR PARTIAL EXTRACTION 100 KG

# MASTER DE

The innovations that simplify identification of the contents of the drawers.

With Sylogik® Syfront technology, the drawer front is no longer just a closing element but becomes an actual visual interface.

- Customisation with aesthetic and decorative elements
- User input: labels to describe and catalogue the contents
- User output: ability to insert visual or descriptive messages on the handle

## CUSTOMISABLE HANDLES

**A WEALTH OF INFORMATION**  
Add barcodes, labels or images to handles for quick identification of the contents of each individual drawer.

## COLOURS

The Master DE cabinet is available in 3 colour combinations for the cabinet body while the handle is only available in Dark Grey.

# PROFESSIONAL DRAWER UNITS

## MASTER

The Master tool cabinet is versatile and can be customised down to the smallest detail to create solutions that feature not only **drawers or hinged and sliding doors**, but also **pull-out shelves and slotted shelves**. Based on the type of guide installed on drawers and shelves it is possible to have a flexible **pull-out from 92 to 100%** with a **load capacity between 50 and 100 kg**, or a **100% telescopic pull-out with a load capacity of 200 kg**. All drawers are equipped with holes and slots for installing the **dividing material and the tool trays**, while the upper shelf can be enriched with various types of **tops**. The lower part, instead, is designed for installing **wheels or plinths**.

**DRAWER LOAD-BEARING CAPACITY FROM 50 TO 200 KG**

**PERFORATED DRAWERS**

**BALL BEARINGS**

**KEY-OPERATED CLOSURE**

**VERTEBRATE ANTI-TIPPING ROD**

The rod is in aluminium profile and always remains fixed, without rotating.

The closing movement is obtained by means of **anchors that move vertically** exploiting one of the elementary forces of physics: **gravity. The simpler the movement, the less likely the risk of breakages.**

**The rod is drilled with a 25 mm pitch** and allows the application of several closing heads. This means being able to divide access to the drawers into several groups. The division of the groups is configurable in height.

**MECHANICAL SYSTEM**

The mechanical control system of the locking unit uses Sylogik® technology. **The differences are decisive.**

**The system of transmission from the lock cylinder to the rod head consists of steel wires with an elastic sheath and linear movement.**

Compared to the common fixed square rod systems with rotary movement, it allows releasing of the parallelism of the lock cylinder position with respect to the rod head. This allows the designer to apply the cylinder in the most suitable point of the cabinet.

**The lock cylinder rests on a guide drum** so that it is possible to choose from a variety of cylinder manufacturers\*. In this way the cabinet can be integrated with other pre-existing ones, keeping the same type of key.

\* Option on request with extra charge

**FULL EXTENSION**

**FREE TO CONFIGURE**

Change the drawer's extension quickly and easily to increase the load-bearing capacity up to 100 kg.

**HIGH-PERFORMANCE RUNNERS**

**QUICK MOVEMENT WITHOUT PROBLEMS**

The runners as long as the drawers allow the bearing to be moved to the front of the cabinet, thus increasing the visibility, load-bearing capacity and extension.

**PERFORATED DRAWERS**

**ORGANISATION DOWN TO THE MILLIMETRE**

Holes and slots on the drawers make it easier to add internal dividers for optimally arranging tools and materials.

# MASTER

## DRAWER EXTRACTION AND MANAGEMENT

The Master drawer represents a revolution in the world of industrial furnishing as it was designed and developed to be customised independently in terms of extraction/capacity and internal division.

## FREELY CONFIGURABLE

The new flexible extension guide allows mechanical adjustment of the rear stop of the drawer/retractable shelf in 3 different positions, thus obtaining 3 different capacities: 50, 75 and 100 kg. The installation of the innovative telescopic guide increases the capacity of the pull-out drawer/shelf up to 200 kg. A label indicates the maximum capacity of the drawer depending on its extraction and the type of guide.

### FLEXIBLE GUIDE CONFIGURED FOR FULL EXTRACTION 50 KG

### FLEXIBLE GUIDE CONFIGURED FOR FULL EXTRACTION 75 KG

### FLEXIBLE GUIDE CONFIGURED FOR PARTIAL EXTRACTION 100 KG

### TELESCOPIC GUIDE CONFIGURED FOR FULL EXTRACTION 200 KG

# MASTER

The innovations that simplify identification of the contents of the drawers.

With Sylogik® Syfront technology, the drawer front is no longer just a closing element but becomes an actual visual interface.

- Customisation with aesthetic and decorative elements
- User input: labels to describe and catalogue the contents
- User output: ability to insert visual or descriptive messages on the handle

## CUSTOMISABLE HANDLES

### A WEALTH OF INFORMATION

Add barcodes, labels or images to handles for quick identification of the contents of each individual drawer.

## MODULARITY

The various elements that compose the Master series can be easily **integrated with each other to create complete furnishing compositions ready for anything**. It is thus possible to create, for example, counters with drawers and doors equipped with 4 edges to perform maintenance and tasks or to be used as customer reception points in shops or warehouses.

Courtesy of Fridle Group

# MASTER

## TOP IN SATIN STAINLESS STEEL

The satin stainless steel top allows work and interventions to be performed without damaging the cabinet. It features a high level of corrosion and heat resistance.

## MULTIPLEX TOP

The multiplex top transforms the upper part of the cabinet into a solid and robust work surface. It is resistant to shocks and scratches and is suitable for heavy-duty operations.

## RUBBER LINED STEEL TOP

The top is made of galvanised steel and coated with oil-resistant rubber. It is particularly suitable for the use of oils or for interventions that involve cutting tools.

## 3-EDGE TOP SHELF COATED WITH PVC

The PVC-coated 3-edge top protects the upper part of the cabinet and, thanks to the raised edges, prevents the material placed on it from falling off.

## BASES

The bases have a dual function: they raise the drawer cabinet off the floor and allow it to be moved using forklift trucks or transpallets.

## WHEELS

The cabinets can be supplied with wheels to transform them into practical tool trolleys. As standard they are equipped with 2 swivel wheels with brakes and 2 fixed wheels.

## ANTI-TAMPERING SYSTEM

### SAFETY FIRST OF ALL

Unlike other cabinets currently on the market, the patented closure system prevents thieves from by-passing the closure. Any forced opening will always be visible.

## ADJUSTABLE ERGONOMIC HANDLE

The cabinets with wheels are supplied with a practical adjustable ergonomic handle which can be installed in two different positions. The height of the handle can therefore be set according to the height of the user to allow agile and easy handling of the cabinet while maintaining an ergonomic posture in order to reduce strain during work which could lead to possible injuries.

# MASTER

## COLOURS

The Master cabinet is available in 12 colour combinations which can be associated with 8 different colours for the handles to create customised solutions down to the smallest detail. It is therefore possible to assign specific colours to particular work areas or projects or to implement the corporate colour even in the furnishings installed in the company.

**10** RAL colours for the metal part  
**8** colours for the plastic accessories  
**Infinite combinations**

# PC CABINETS

## MASTER CS

# PC CABINETS

## STANDARD CS

The PC cabinets of the Master CS and Standard CS series are used as **workstations** in departments, production areas and warehouses. The sturdy metal structure, in fact, protects the **computer and hardware** from dirt and possible impacts and is equipped with holes for network cables, for the electric cable and has an air inlet hole with dust filter. **Standard CS** is a **single-piece** solution with screen compartment, drawer and lower compartment with hinged doors and shelves. **Master CS**, on the other hand, is **modular** and has a lower cabinet with hinged doors with drawer and shelves, while the upper part can be left free or set up with a cabinet with a polycarbonate door.

FORCED VENTILATION

ELECTRICAL SYSTEM  
WITH DE CH GB FR  
SOCKETS

PULL-OUT SHELF FOR  
KEYBOARD

CABLE TRAY

# COMPUTER CABINETS

## MASTER CS

1. Door with safety lock and polycarbonate glass.  
Useful dimensions: 655x215x465 mm H
2. Possibility of inserting screens up to 21".  
Internal dimensions of the top compartment: 710x215x530 mm H
3. Pull-out drawer with keyboard shelf and 2 locking positions; when open, rear space for objects.  
Useful dimensions: 655x465 mm H
4. Compartment with the possibility of inserting pull-out shelves and height-adjustable shelves, to house hardware systems and printers.  
Usable insertion width: 663 mm. Usable height: 754 mm
5. Hole for network cables and cable outlet hole for electrical system
6. Air inlet hole with dust filter
7. Electrical system with 4 Schuko sockets
8. 4-lane cable trays
9. Cooling fan with dust filter
10. Retractable shelf.  
Dimensions: 602x449 mm
11. Adjustable shelf.  
Dimensions 663x560x52 mm H

Cabinet purchasable without the top module.  
Excellent for solutions with laptops and touch screens.

## STANDARD CS

12. Door with safety lock and polycarbonate glass.  
Useful dimensions: 661x525 mm H
13. Possibility of inserting screens up to 21".  
Internal dimensions of the top compartment: 690x600x580 mm H
14. Keyboard shelf.Useful dimensions: 620x510 mm H
15. Lower compartment with the possibility of inserting pull-out shelves and height-adjustable shelves, to house hardware systems and printers.  
Internal dimensions: 690x600x720 mm H
16. Hole for network cables and cable outlet hole for electrical system
17. Air inlet hole with dust filter
18. Electrical system with 4 Schuko sockets
19. 4-lane cable trays
20. Cooling fan with dust filter
21. Retractable shelf.  
Dimensions: 650x582x36 mm H
22. Adjustable shelf.  
Dimensions 688x591x38 mm H

# CABINETS WITH HINGED DOORS

## PERFORM

Perform hinged door cabinets are **multi-purpose solutions** that easily adapt to numerous environments and different uses. In fact, thanks to the **wide range of components** such as slotted shelves, perforated panels, drawers, cable runs, and watertight tanks, it is possible to transform Perform into tool cabinets, for ecology or for recharging. They are available in **three different widths** (512, 1023 or 1193 mm) and **two heights** (1000 or 2000 mm), all with a **555 mm depth**. Depending on the model chosen, it is possible to opt for **smooth, slotted or polycarbonate slotted doors**.

# CABINETS WITH SLIDING DOORS

## PERFORM

The Perform sliding door cabinet is perfect for installation in transit areas or if you are looking for **space-saving furniture** with a high storage capacity. It can have **three widths** (1020, 1428 or 2040 mm) and **two heights** (915 or 2000 mm) and **smooth, slotted or polycarbonate slotted doors**. Regardless of the model chosen, the **depth is 600 mm** and can accommodate a wide range of components such as slotted shelves, perforated panels, drawers, watertight tanks and electrical cable runs.

**LOAD CAPACITY**  
800/1200 KG

**DOOR WARRANTY**

**KEY-OPERATED CLOSURE**

**MOUNTED CABINET + ACCESSORIES PACKED INSIDE THE CABINET**

# CHANGING-ROOM LOCKERS

## PERFOM

Made of sturdy sheet steel, changing room cabinets ensure storing clothing and work clothes is easy. Each compartment has a **depth of 500 mm** and is closed by a door with slits for air circulation and a **cylinder lock with key**. The configuration with **dirty/clean divider** and **sloped roof** makes them suitable for use in environments that require a high level of cleanliness and which must comply with HACCP regulations. The changing room cabinets can be further enriched with **water-resistant polypropylene feet** and single **benches** of various sizes.

**POLYPROPYLENE FEET**  
- EASY TO CLEAN

**ELECTROPHORETIC COATING**

**VERSION WITH HELMET COMPARTMENT**

**KEY-OPERATED CLOSURE**

# CNC TOOL STORAGE SYSTEMS

## NC

NC solutions feature special bushings and frames for safely and tidily organising mandrels and other tools typically used in numerical control machinery. The **ABS bushings** are resistant to impacts, can be easily cleaned and are available in different sizes based on the type of instrument to be contained. They are positioned on **horizontal or inclined frames** which can be installed directly on a workbench support, on a trolley or inserted into cabinets inside drawers or to replace shelves.

**FULL-EXTENSION  
DRAWERS**

**CABINET LOAD  
CAPACITY 1200 KG**

**WIDE RANGE OF  
TOOL HOLDERS**

**CONFIGURABLE**

# HAZARDOUS SUBSTANCE STORAGE SYSTEMS

## ECOLOGY

The collection trays prevent accidental spills of hazardous substances in accordance with (Italian) Legislative Decrees no. 152/2006 and no. 81/2008. Warning! Remember not to store in the same tray chemical substances that can react with one another when they come into contact and to check the compatibility of the hazardous substances stored with the material used to manufacture the tray and the grille. The capacity of the containers that can be stacked above each tray and the information provided, which are not exhaustive nor binding, are valid for the Italian territory. For other countries, always comply with the specific provisions in force in the country of use and contact the competent local authorities for further information.

### COLLECTION TANKS + PERFORM STEEL SHELVES AND TANKS

Suitable for flammable liquids under **GHS categories 1 - 3** and water-polluting liquids under **GHS categories 1 - 4**. **Corrosive substances are not allowed.**

### PE COLLECTION TANKS

Suitable for water-polluting liquids under **GHS categories 1 - 4**. **Flammable substances are not allowed.**

# WORKSHOP TROLLEYS

## CLEVER-COMBI

Clever and Combi are practical trolleys for moving products and equipment in the work environment. In particular, **Clever** is an innovative **modular trolley** which can also be used as a workshop trolley thanks to the possibility of customising it with shelves or a wooden worktop, drawers, perforated panels, doors, Iron Team hooks and accessories. **Combi**, on the other hand, has one or two **platforms** which make it ideal for use in **warehouse** for handling semi-finished products or products.

# MULTIPURPOSE MODULAR TROLLEYS

## BIN CART

The Bin Cart trolley features a **basic structure consisting of a frame and double-sided uprights** which can be set up with a **wide range of components** to adapt it according to the operator's needs. Shelves, perforated panels, supports, hooks and container profiles transform Bin Carts into trolleys for warehouse picking, tyre holders, 5S Lean Production, holders for small parts, racks, for harnesses and much more. They are available in **three different widths** (700, 1000 or 1500 mm), **two heights** (1201 and 1809 mm) and can have wheels in standard rubber, synthetic non-marking rubber or elastic rubber.

**EASY TO  
ASSEMBLE**

**TROLLEY LOAD  
CAPACITY 300 KG**

# GEAR GARAGE

## FEATURES

### IT ALL STARTS AT THE TOP

The lower modules have a 630 mm deep worktop, providing ample space to work in comfort.

### THE SLIDING DOOR

Cabinets with sliding doors increase the storage capacity of the workstation by reducing the clutter and obstacles that would result from using cabinets with hinged doors.

Courtesy of Trident Motorsport

### A SECRET CABINET

The technical cabinet is designed to conceal cable reels and electrical cables, so that only those items required for the job are readily visible.

### GARAGE FLIP-UP OPENING

Flip-up openings can be inserted in the lower modules to utilise space that would otherwise be wasted. They facilitate the sorting of waste, and help to keep the workplace clean and tidy.

### AROUND THE CORNER

The corner module can be upgraded with up to 4 electrical sockets and 2 cable reels. It allows for optimal use of space and a large worktop surface.

### A DRAWER FULL OF SURPRISES

100% extension and 70 kg load capacity make these drawers the ideal storage solution for work equipment and tools. Full pull-out provides a complete view of the interior and facilitates removal of the stored items.

### FREE-STANDING

All Gear Garage solutions require no masonry anchoring. The various structures such as modules and wall units are free-standing.

### SUSPENDED STORAGE

The wall unit, with soft touch vasistas opening, can be mounted on walls or perforated walls and provides an additional space for work equipment organisation.

## MODULES

The modular Gear Garage system permits integration of several modules to create structures that can be easily adapted to the size of the space where they are to be installed. The modules are available in 7 different widths, from a minimum of 512 mm to a maximum of 2040 mm, and are subdivided into base modules, worktops, wall units, cabinets, chests of drawers and corner units.

## TOPS IN VARIOUS DESIGNS

Satin **Stainless steel**

**Rubberised Steel**

**Multiplex Wood**

## WARRANTY

The 10-year warranty on Fami products aptly reflects the premium-quality materials we use and the care and dedication that go into the production of our furnishings to make them reliable and durable.

Courtesy of Trident Motorsport

**ALL THE COLOURS AND THEN SOME!**

Depending on the environment where it is installed or on the corporate colours, Gear Garage can be in a single-colour or twotone. Up to 12 RAL colours are available to customise the frame and façades.

**FRAME**

**FAÇADES**

\*Frame and façades in **Ideaone** colours RAL 7035 + RAL 7016 are available from stock.

# GENERAL CONDITIONS OF THE CONTRACTUAL WARRANTY OFFERED BY FAMI

Dear Customer,

Every Fami Srl product that you purchase is accompanied by a contractual warranty (the "Warranty") that is regulated in accordance with the terms and procedures specified below.

## 1. RECITALS

1.1 In the Conditions that follow, the terms specified below shall have the following meaning:

a) Seller: Fami Srl;

b) Customer: any party (physical person, company, body or legal entity) that purchases the Seller's Products;

c) Product(s): the goods manufactured, assembled and/or marketed by the Seller, excluding Products under the Store Van brand.

## 2. SCOPE OF THE WARRANTY

2.1 Fami Srl guarantees that the Products are free from faults and conform to the technical specifications declared by the Seller.

2.2 It is agreed that the dimensions of Products are to be understood as taking into account the margins of operating tolerances existing on the market, with reference to the type, quantity and quality of the Products. The Seller, therefore, does not guarantee the Products' compliance with particular specifications or technical characteristics or their suitability for particular uses other than those indicated in the technical specifications stated by Fami Srl and provided in the user and maintenance manual, unless such characteristics have been expressly agreed in the sales contract.

2.3 If Product defects are reported by the Customer and subsequently confirmed, the Customer will be entitled to have the Product repaired free of charge or, if repair is impossible or prohibitively expensive, the free replacement of the Product, at the sole discretion of the Seller and with the exclusion of any further or different obligation on the part of Fami Srl.

2.4 The Warranty does not affect the rights provided by Legislative Decree No. 206 06/09/2005, as amended and supplemented (the "Consumer Code"), if the Customer qualifies as a "consumer". Such rights therefore remain intact.

## 3 WARRANTY APPLICATION CONDITIONS

3.1 To activate the Warranty, the Customer must inform Fami Srl, within the time limits stated in articles 4 and 5 below, of any defects found, by submitting a Complaint (the "Complaint") containing the information specified in art. 5 below.

3.2 Once the Complaint has been made, the Customer must immediately refrain from using the defective Product(s).

3.3 Upon receipt of the Complaint, the Seller shall make every effort to ascertain the existence, nature and extent of the defects and to verify the timeliness of the Complaint pursuant to art 5 below. For these purposes, the Customer must make the defective Product(s) available for inspection, including through sending photographic documentation or the use of videoconferencing systems. The Product will be repaired by the Seller at its own premises or branch, or at the premises of an authorised dealer. The Seller reserves the right to repair the Product at the Customer's premises. If necessary, the Customer will be required to send, at its expense, the defective Product to one of the above locations, as indicated by the Seller, notwithstanding the provisions of the Consumer Code. The Seller shall send the new Product or the repaired Product to the Buyer and shall bear the shipping costs.

3.4 The repair of a defective Product shall be carried out within a reasonable time in relation to the extent of the defect.

## 4. DURATION – COVERAGE PERIOD

4.1 The Product Warranty will have a duration of 10 years starting from the Product delivery date, except in the case of marketed products, electronic components, software and wear parts, which have a warranty of 12 months starting from the delivery date of the parts. Please note that "delivery date" is understood as the date on which the Products leave the Fami Srl warehouses for delivery to the Customer, unless otherwise provided for in the sales contract.

4.2 For repaired or replaced Products, the warranty begins again for 12 months from repair or replacement. Overall, therefore, the duration of the Warranty for Products repaired or replaced by the Seller is a maximum of 11 years or, in the case of marketed products, electronic components, software and wear parts, a maximum of 24 months from the beginning of the duration of the Warranty referred to in article 4.1 above.

4.3 Upon expiry of the term referred to in article 4.1 above, the right of recourse provided for by art. 131 of the Italian Consumer Code, when applicable, shall be considered as time-barred and inadmissible.

## 5. SUBMISSION TIME LIMITS AND PROCEDURES

5.1. During the period of validity of the Warranty, any complaints relating to the state of the packaging, quantities, number or external features of the Products (faults and defects not hidden and visible from the outside) must be specified by the Buyer on the delivery note, and the Transport Document must be signed, indicating the words "reserving all specific rights". No later than 2 (two) working days from receipt of the Products, the Customer must send the Seller, in an email to: [assistenza@famispaspa.it](mailto:assistenza@famispaspa.it), a copy of the delivery note and related photographic evidence, providing detailed information on the condition of the Products and the nature of the defects found.

5.2. Any complaints relating to defects not detectable by careful inspection at the time of receipt of the Products (faults and hidden defects) must be submitted to the Seller, under penalty of forfeiture, within and no later than 7 (seven) days from the date of discovery of the defect, via certified email to: [pec@pec.famispaspa.it](mailto:pec@pec.famispaspa.it), specifying the precise product code, the batch (if available), the date of delivery and nature of the defect.

## 6. EXCLUSIONS AND LIMITATION OF LIABILITY

6.1 The warranty does not apply to products whose defects are due to: a) transport operations; b) non-compliance with measures that are part of normal maintenance practices; negligent and careless use; c) failure to follow the Seller's instructions for the use and/or storage of the product; d) failure to comply with the installation norms, and/or any other indications or instructions shown on the technical notes supplied with the product if the Seller has not already directly performed the installation; e) tampering, maintenance in general, adjustments attempted by the Customer or by persons not authorised by the Seller; f) abnormal use and/or misuse of the Product, placement of the Product in damp, excessively hot, cold, dusty or harmful environments (with chlorine, lacquers, paints or other chemicals and/or toxic agents present) or in any environments not suitable for the proper storage of the Products, insofar as such circumstances have not been reported to the Seller before the purchase of the Products and the Seller has guaranteed the Products' tolerability of such environments; g) worsening of the damage caused by the Customer's use of the Products after the defects have been detected; h) use of spare parts, components and accessories that are not original or not recommended by the Seller (replacement or repair of non-original parts cannot be requested) and damage caused to the Product by the use of such parts; i) anomalies or defective functioning of the power supply;

l) corrosion, incrustations or breakages caused by stray current loads, condensation, aggression or acidity of water, improperly performed descaling treatments, sludge or lime deposits; m) unforeseeable circumstances, force majeure circumstances such as, by way of non-exhaustive example, frost, overheating, fire, theft, natural events (such as, for example, hail, tornadoes, lightning, floods, earthquakes), vandalism, accidents and other similar events.

6.2 The Warranty shall not be applicable if the selling price of the Products has not been fully paid, with the proviso that, if the payment is to be made by instalments, the Warranty shall be immediately applicable and shall remain so as long as the instalments are paid on time.

6.3 The Seller shall not be liable for any damage that may, directly or indirectly, be caused to persons, things or animals as a consequence of non-compliance with all the instructions in the installation, use and maintenance booklet.

6.4 The Seller declines all responsibility for indirect damage caused by the defectiveness of a Product such as, by way of non-exhaustive example, production stoppages or failure to ship or transfer the Product to third parties.

6.5 In any case, the Seller's liability may not exceed the amount paid by the Customer for the individual sales contract, the content of which has given rise to the circumstances regarding a possible claim for damages and/or compensation.

6.6 The Products must be used only for the purposes specified and in compliance with safety regulations, in accordance with the instructions shown in the installation, use and maintenance manual provided by the Seller; if the Customer uses or resells the Products purchased and/or the Products from the Seller for any other purposes, they do so at their own risk and peril, with all consequent liability. In this case, the Seller's contractual and/or extra-contractual liability is excluded both for any direct or indirect damage also suffered by third parties and is excluded also in the case of poor maintenance, improper use, failure to observe safety rules and other conditions; the Customer shall also hold the Seller harmless from costs and/or liabilities that may arise against him.

## 7. COMPETENT COURT AND APPLICABLE LAW

7.1 Any disputes arising from or related to these General Conditions of Warranty and/or individual Contracts such as, by way of non-exhaustive example, disputes relating to their existence, validity, interpretation, effectiveness or execution, shall be resolved exclusively by the Court of Vicenza, even if the Contract contains international elements, without prejudice to the mandatory regulations of the Consumer Code.

7.2 These General Conditions of Warranty are entirely governed by and shall be interpreted under Italian law, even if the Contract has international elements, with the express exclusion of the 1980 Vienna Convention.

# GENERAL CONDITIONS OF SALE

## 1. DEFINITIONS

1.1 Pursuant to the Conditions herein, the terms specified below shall have the following meaning:

- a) Seller: Fami Srl;
- b) Buyer: any company, body or legal entity that purchases the Seller's products;
- c) Products: the goods manufactured, assembled and/or marketed by the Seller;
- d) Order: each proposal for the purchase of Products submitted by the Buyer to the Seller;
- e) Order Confirmation: the Seller's written acceptance of the Order;
- f) Contract: the sale concluded between the Seller and the Buyer at the time of the Buyer's receipt of the Order Confirmation;
- g) Parties: the Seller and Buyer jointly;
- h) Trademarks: all the trademarks of which the Seller is the owner or licensee;
- i) Intellectual property rights: all intellectual and/or industrial property rights of Fami Srl, including, without limitation, the rights relating to patents for inventions, designs or models, utility models, trademarks, know-how, technical specifications, data and software, regardless of whether or not such rights are recorded, as well as any application or registration relating to those rights and to any other right or form of protection of a similar nature or having equivalent effect.

## 2. GENERAL PROVISIONS

- 2.1 These General Conditions of Sale (hereinafter the "Conditions") form an integral part of the Contracts concluded between the Seller and the Buyer for the supply of Products.
- 2.2 The Conditions have effect between Fami Srl (hereinafter "Fami") and the Buyer without the need for an express reference thereto or a specific agreement to that effect. Any different condition or term applies only if confirmed in writing by the Seller.
- 2.3 The Seller reserves the right to amend, supplement or delete any provision of these General Conditions of Sale at any time and to give notification of the changes through the dedicated page of the company website, provided that such additions, amendments or deletions apply to all Sales concluded from the 15th day after the communication (via publication on the web site or via the newsletter or any correspondence sent in writing) of the new Conditions of Sale to the Purchaser.
- 2.4 Any reference to commercial terms (such as EXW, DPA, DPU, DDP, etc.) is to be understood as referring to the Incoterms® of the International Chamber of Commerce, included in the text in force on the date of conclusion of the Contract.

## 3. FIELD OF APPLICATION

- 3.1 These General Conditions of Sale (hereinafter the "Conditions") apply to all contracts (whether concluded by phone, fax, email or website), unless otherwise expressly agreed in writing by the Parties, and form an integral and substantial part of every Order and Order Confirmation, even if not expressly mentioned.
- 3.2 The Buyer may not invoke or object to Conditions other than the Conditions herein. Therefore, any conditions specified in writing by the Buyer in the Order, or in any other phase of the contractual negotiation including after the Order Confirmation, as well as any general conditions of purchase of the Buyer, shall not be valid. Any written or verbal condition sent by collaborators, employees, agents or representatives of the Seller has no effect unless reproduced in the text of the Order Confirmation or unless confirmed in writing by the Seller. In this regard, the partial or complete execution of the Order by Fami or any other fulfilment thereof in respect of the Buyer shall not be valid and cannot be interpreted as tacit or implicit acceptance of any general condition of contract that has not been explicitly signed by Fami.
- 3.3 The Conditions are valid only for contractual relations between Fami and professional operators, so Legislative Decree No. 206 of 6 September 2005 (Consumer Code), as amended, is not applicable.

## 4. OFFERS AND ORDERS

- 4.1 The offers made by the Seller are not to be considered binding. The information in catalogues, brochures and price lists are not binding for the Seller, who reserves the right to make any changes to the Products and their prices. Therefore, the Seller shall be considered solely bound by the information in the Order Confirmation.
- 4.2 Each Order sent by the Buyer, either directly to Fami or through the agents or representatives of the Seller, is understood as an irrevocable purchase offer that will remain effective for 30 (thirty) days from the date of its regular receipt by the Seller, unless waived by explicit declaration from time to time.
- 4.3 The Buyer's submission of the Order implies that he or she has fully read and acknowledged all the Conditions herein, which shall therefore be understood as fully accepted by the Purchaser without limitations or reservations.
- 4.4 Orders and/or changes to Orders made verbally or by phone must be confirmed in writing by the Buyer. Otherwise, the Seller shall not be responsible for any errors or misunderstandings.
- 4.5 The Seller expressly reserves the right to evaluate any Order without being bound accept it.
- 4.6 Orders duly accepted by the Seller via the Order Confirmation cannot be cancelled by the Buyer without the written consent of the Seller.

## 5. CONCLUSION OF THE CONTRACT

- 5.1 The Contract may be considered concluded only after the sending of an Order Confirmation by Fami (via email, fax or other equivalent electronic means) for each individual Order. In any case, the issue of the invoice by the Seller or the execution of the order by the Seller will be considered as confirmation.
- 5.2 If the Order Confirmation contains additions, limitations or other changes to the Order, the Buyer's assent to these changes will be deemed tacitly given unless written notification is sent to the Seller within two working days of their receipt of the Order.
- 5.3 Changes and additions requested by the Buyer after the conclusion of the Contract will have no value and effect unless the Seller accepts them in writing, with possible clarification of the new delivery time, price and payment method.
- 5.4 All Contracts are always considered concluded at the registered offices of Fami Srl in Italy, 36027 Rosà (Vi), Via Stazione Rossano 13.

## 6. PRICES

- 6.1 The prices of the Products shall be those specified in the Seller's price list in force at the time the Order is finalised or, if the Product is not included in the price list or the price list is not available, those specified in the Order Confirmation.
- 6.2 The prices of the products will be those indicated in the Order Confirmation and, unless otherwise agreed, are understood as applicable to goods delivered ex works (EXW). These prices, unless stated otherwise in the Order Confirmation, do not include the costs and expenses of special packaging, shipping, insurance and transportation from the Seller's premises, any expenses, taxes or duties relating to the sale of the Products, including the costs of all customs formalities (by way of non-exhaustive example: customs duties, taxes and other charges for the exportation of the Products), which shall be borne by the Buyer.
- 6.3 The Seller reserves the right to make a price adjustment in the event of a change in (a) the Contract, requested by the Buyer after the conclusion thereof and accepted by the Seller, and in (b) the type of delivery, material or execution of the Products due to the incompleteness or inaccuracy of the information and/or documentation provided by the Buyer.

## 7. TERMS OF PAYMENT

- 7.1 At the time of conclusion of the Contract, the Seller may ask the Buyer to pay a deposit of 30% of the value of the supply order. The Parties may agree in any case the payment of a different confirmation deposit, subject to prior written agreement in the Contract.
- 7.2 In the event of non-payment of the deposit, the Contract, where applicable, shall be considered terminated ipso jure and the Seller may demand payment of any amounts accrued as at that time, in addition to compensation for any financial and non-financial damages and costs, including legal costs where incurred.
- 7.3 Where the terms of payment are not specified in the Contract, the payment must be made by bank transfer within 30 days from the end of month invoice date. The payment shall be considered effected when the amount becomes available to the Seller at its bank in Italy. If the Parties have agreed on advance payment without further specifications, it is assumed that the advance payment refers to the entire price of the Products included in the supply order. In the case of delivery in instalments, the Buyer shall pay the appropriate amount for each delivery batch, unless otherwise agreed in writing in the Contract.
- 7.4 Payments must be made in the agreed currency and any banking fees or commissions owed in connection with the payment will be fully borne by the Buyer.
- 7.5 In the case of partial non-payment or delayed payment by the Buyer, the Seller shall have, without prejudice to all other rights, the right to suspend further deliveries even if they were due under separate contracts and to demand immediate and full payment of all the goods ordered and to postpone its deliveries for a period equivalent to the delay in payment, whatever the amount may be, until the payment and related interest on arrears has been settled.
- 7.6 Such non-payments and late payments shall give the Seller the right to recognition and payment, in its favour, of the interest on arrears pursuant to Legislative Decree No. 231/2002, in addition to costs, including legal costs, which may be considered necessary for the recovery of the sums due to the Seller for any reason.
- 7.7 Failure to pay even a single invoice will result in the Seller having the right to terminate any Contract concluded with the Buyer pursuant to art. 1456 of the Italian Civil Code and to suspend the processing or delivery of any other order supply in progress, without prejudice, in any case, to full compensation for any damage resulting from the Buyer's non-fulfilment or delay. Any delays in the processing of orders or in deliveries, caused by previous suspensions of production due to non-payments by the Buyer do not constitute non-fulfilment by the Seller.
- 7.8 Any claims or disputes shall not give the Buyer the right to suspend or delay payments.

## 8. DELIVERY TERMS

- 8.1. The delivery time shall be that indicated in the Order Confirmation and, unless otherwise agreed, shall be understood as ex-works (EXW) from the Seller's plant. If requested and expressly agreed in writing in the Contract, Fami shall take care of the transportation of the Products, at the risk, cost and expense of the Buyer. Any transport costs shall be borne by the Buyer and shall not affect shipment risks, which shall continue to be borne by the Buyer at the latest upon delivery of the Products to the first carrier.
- 8.2. The delivery of the Products must take place within the time specified in the Contract, calculated in working days, with the specification that delivery times are purely indicative and are not essential terms and, in any case, do not include transport times. The Seller shall, therefore, not be responsible for any delay in delivery for any reason.
- 8.3. If the Buyer asks the Seller for a change in the delivery time, the request must be made in writing and the Buyer must in any case settle the payment for the order supply within the terms indicated in article 7 of these Conditions. The only costs excluded are those for storage, delivery, assembly, disassembly and installation, which must be paid within the new agreed delivery date.
- 8.4. Upon receipt of the notice of goods ready for shipment, the Buyer must collect the goods within 10 (ten) days. Otherwise, the Products may be stored outdoors, with the Seller being released from any liability and all guarantees being forfeited in favour of the Seller; the Buyer shall bear any handling and storage costs incurred by the Seller, which may also, at its discretion, have the Products placed in storage at the Buyer's expense.
- 8.5 The Seller shall be entitled to issue a regular invoice within 10 (ten) days from the notice of goods ready for shipment.
- 8.6 In the case of delayed pick-up of the prepared goods for any reason not dependent on the will of the Seller, the delivery shall be deemed to have been made ten days after the communication

of the notice of goods ready for shipment. In this case the Seller shall have the right to issue an invoice and to claim fulfilment of the agreed terms of payment and may carry out the packaging, transport or storage of the goods at the Buyer's expense, without prejudice to compensation for any damage suffered, including for warehousing, safekeeping and storage of goods.

#### 9. WARRANTY AND COMPLAINTS

9.1 The rules for the Warranty offered by the Seller are set out in the General Conditions of Warranty document viewable at [www.famispa.com](http://www.famispa.com) on the site and, with regard solely to Products under the Store Van brand, in the General Conditions of Warranty document viewable at [www.storevan.com](http://www.storevan.com).

9.2 At the time of receipt of the Products, the Buyer must inspect the Products in the presence of the carrier entrusted with delivery, in order to check for any defects visible from the outside (such as, by way of non-exhaustive example, the quantities and packaging of the Products or the Products' conformity with the indications of the Order Confirmation).

9.3 Any complaints relating to packaging, quantities, number or external features of the Products (faults and defects not hidden and visible from the outside) must be specified by the Buyer on the delivery note and the Transport Document must be signed, indicating the words "reserving all specific rights". No later than 2 (two) working days from receipt of the Products, the Buyer shall send the Seller, in an email to: [assistance@famispa.it](mailto:assistance@famispa.it), a copy of the delivery note and related photographic evidence, providing detailed information on the condition of the Products and the nature of the defects found.

9.4 Without prejudice to the duration of the Warranty offered by the Seller, any claims for defects not detectable by careful inspection at the time of receipt of the Products (faults and hidden defects) must be submitted to the Seller, under penalty of forfeiture, within and no later than 7 (seven) days from the date of discovery of the defect, via certified email to: [pec@pec.famispa.it](mailto:pec@pec.famispa.it), specifying the product code, the batch (if available), the date of delivery and nature of the defect.

9.5 Any Product for which no objection has been raised in accordance with the procedures and terms indicated above shall be considered approved and accepted by the Buyer.

9.6 In no case shall the Seller's agents, customers or intermediaries have the power to represent and commit the Seller to any binding obligations to the Buyer or other third parties. To this end, any communication relating to faults or defects of the Products shall be invalid and ineffective if made to the agents, customers or intermediaries of the Seller, or in any form or manner other than those indicated above.

#### 10. RETENTION OF TITLE

10.1 The Products remain the property of the Seller until the date on which the Purchaser has paid the full price of the Products and all sums due to the Seller.

10.2 If in the Buyer's country of domicile it is necessary, for the validity of the Seller's retention of title, to ensure the completion of administrative or legal formalities, including, without any limitation, the registration of the Products in public registers or the affixing of special seals on the Products, the Purchaser hereby agrees to cooperate with the Seller to carry out all the necessary acts to obtain the valid right, including with respect to third parties, to the retention of title.

#### 11. FORCE MAJEURE

11.1 Both the Buyer and Fami may suspend the performance of their contractual obligations when said performance becomes impossible or unreasonably burdensome due to an unforeseeable impediment that is not under their control, such as, by way of non-exhaustive example, strikes, epidemics and/or pandemics, boycotts, lockouts, fires, wars, riots and revolutions, requisitions, embargoes or power cuts.

11.2 The Party wishing to invoke this clause must immediately inform the other Party in writing, by certified email, of the occurrence and cessation of the of force majeure circumstances.

11.3 If the suspension due to force majeure lasts more than eight weeks, each Party shall have the right to terminate the Order, subject to 10 days' notice, to be conveyed to the other in writing, by registered letter with return receipt or by certified email.

11.4 In any case, it is understood that the Seller will be entitled to receive payment for any Products already delivered, in addition to reimbursement of any expenses already incurred.

#### 12. CHANGE IN THE BUYER'S FINANCIAL SITUATION

12.1 Fami shall be entitled to suspend the fulfilment of the obligations arising from the supply of the Products in the event that the Buyer's financial situation becomes such as to seriously endanger the Buyer's ability to pay, unless a suitable guarantee is given. It is understood that the Seller will be entitled to receive payment for any Products already delivered, in addition to the reimbursement of any expenses already incurred.

#### 13. INTELLECTUAL PROPERTY RIGHTS

13.1 Intellectual Property Rights are the total and exclusive property of the Seller and their communication or use within the scope of these Conditions does not constitute, in relation to them, any right or claim on the part of the Buyer. The latter undertakes not to perform any act incompatible with the ownership of the Intellectual Property Rights.

13.2 The Buyer declares that: a) the Seller is the exclusive owner of the Trademarks; b) it shall refrain from using and registering marks that are similar to and/or confusable with the Trademarks; c) it shall use the Trademarks only in accordance with the Seller's instructions and only for the purposes set out in these Conditions.

#### 14. COMPETENT COURT AND APPLICABLE LAW

14.1 Any disputes arising from or related to these General Conditions of Sale and/or individual Contracts such as, by way of non-exhaustive example, disputes relating to their existence, validity, interpretation, effectiveness or execution, shall be resolved exclusively by the Court of Vicenza, even if the Contract contains international elements.

14.2 Notwithstanding the above, the Seller in any case has the right to bring the dispute before the competent court at the place of the Buyer's registered offices.

14.3 These General Conditions of Sale and/or each individual Contract are entirely governed by and shall be interpreted under Italian law, even if the Contract has international elements, with the express exclusion of the 1980 Vienna Convention.

#### 15. PRIVACY POLICY

15.1 The Buyer declares that it has received all the information provided in accordance with art. 13 of EU Regulation No. 2016/679 (GDPR) and gives its consent to the processing of personal data for the purposes referred to in these general conditions of sale and to be aware that in relation to the data supplied, it may exercise the rights provided by Legislative Decree 196/2003 and by Regulation EU No. 2016/679 (GDPR). The Seller declares that the controller of the data collected is Fami Srl, with registered offices in Rosà (VI), Via Stazione Rossano 13, VAT No. and tax code 03498610249.

#### 16. COMPLIANCE WITH LAW 231/2001

16.1 The Buyer acknowledges that Fami Srl has adopted and implements an Organisation, Management and Control Model pursuant to Legislative Decree 231/01, along with the related Code of Ethics and Disciplinary System, details of which can be viewed on the company website [www.famispa.com](http://www.famispa.com). The Buyer endorses the principles of the aforementioned Organisation, Management and Control Model and its annexes, and undertakes to comply with its contents, principles and procedures and, in general, to refrain from any conduct that may constitute any of the offences specified in Legislative Decree 231/01, as amended, and included in the aforementioned Organisation, Management and Control Model. The Buyer also undertakes to comply with, and to ensure its employees' compliance with, all the principles stated in said documentation and the behavioural protocols provided by our organisation, pursuant to Legislative Decree 231/2001 and the annexes to this contract. Any breach of the rules provided by the aforementioned documents shall constitute a serious breach of contract.

#### 17. FINAL PROVISIONS

17.1 Should one of the Parties fail to take legal action or exercise their rights under these Conditions, such acquiescent conduct cannot be interpreted as a final waiver of such legal action or the exercising of such rights in the future.

17.2 The sale of Products by Fami to the Buyer does not give the latter any exclusive territorial right nor does it allow the Buyer to take on the status of distributor or dealer for Fami.

17.3 The partial or total invalidity of individual provisions of these Conditions shall not affect the validity of the remaining provisions.

## PATENTS

Some of the components are protected by a European design model and/or an industrial invention patent.
